STRUCTURAL GLASS

PRECISION CRAFTSMANSHIP AND DIVERSE OPTIONS

Our Structural Hardware Partners

VITRUM™ Glass Group incorporates cutting-edge CNC technology with decades of experience and dedicated craftsmanship to produce all-glass entrance ways and shower doors. These products demand the highest level of precision including exceptional miters, distinctive cut-outs, and superior edgework for a frameless one-of-a-kind creation. All-glass doors from Vitrum deliver a stunning entry into any space.

Entrance & Shower Door systems can be created from various glazing options, including tempered, heat-soaked, and laminated glass, that can be finished off with digital or screen printing. These are complemented by a large selection of traditional and contemporary hardware offerings. Vitrum can provide glass with or without a complete hardware solution.

Contact us today at structural@vitrum.ca to start designing your new door system.

GLASS DOORS & ENTRANCES

The all-glass entrance has become increasingly popular with architects and interior designers. The glass used for heavy glass doors and entrances are fully tempered, clear, ultraclear, or tinted monolithic lites, in any of the following thicknesses: 3/8" (10mm), 1/2" (12mm), 5/8" (16mm), or 3/4" (19mm). Vitrum offers the following Standard Styles:

STYLE 01 (P)

Full width top & bottom rails.

STYLE 02 (BP)

Full width bottom rail with a partial rail at the top pivot corner. The top pivot corner may also accommodate a smaller profile patch fitting.

STYLE 03 (A)

Partial rail for top & bottom pivot corners. This also accommodates the smaller profile patch fittings. A floor lock is not available in this style.

STYLE 04 (F)

Partial rail for top, bottom, and at the leading edge of the door, which can be utilized for a floor lock. This style can accommodate smaller profile patch fittings.

SHOWER DOORS

Glass shower doors are a preferred choice in modern bathrooms due to their sleek and elegant appearance, as well as easy maintenance. The glass used for shower glass doors are fully tempered, clear, ultraclear, or tinted monolithic lites, in any of the following thicknesses: 3/8" (10mm) or 1/2" (12mm).

ADDITIONAL GLASS PROTECTION

VITRUM™ Glass Group is proud to be a certified applicator of EnduroShield. It chemically bonds to the glass substrate, and transforms the glass into a high performance, hydrophobic and oleophobic (water and oil repellent) surface and protects the glass against staining and etching.
